

Material Safety Data Sheet

Lube Wax

Manufacturers Code: 15297A, 15298A

PHYSICAL DESCRIPTION AND PROPERTIES

Appearance and odour: Waxy feeling solid, slight odour.

Solubility in water: Insoluble.

Specific Gravity: Approx 0.92 (H₂O = 1)

Melting/softening point: Melts in the range 40°C - 90°C

Chemical Family: Mixture of various grades of hydrocarbon waxes and resins.

Ingredients:

Chemical Entity	Proportion
Paraffin Wax	0 - 100%
Microcrystalline Wax	0 - 100%
Petroleum Wax	0 - 100%
Non Hazardous Natural Waxes	secret

Health Hazard Information

Health Effects:

If Swallowed: Considered non toxic by ingestion.

Eye Contact: Data suggests that this product should be classified as non irritating to the eyes.

Skin Contact: Data suggests that the product should be classified as non irritating or harmful to the skin.

Inhalation: Considered to be non toxic and non irritating by inhalation.

First Aid:

If Swallowed: Wash mouth out with water thoroughly, then give further water to drink. No other action should be necessary.

Eye Contact: Flush with water and lift eyelids to ensure thorough irrigation. Do not remove contact lenses unless trained.

Skin Contact: Wash skin with soap and water. Remove clothing if contaminated and wash thoroughly before reuse. If molten material comes in contact with skin, place under cold running water for 15 minutes, wrap with wet material loosely and take to doctor or hospital.

Inhalation: If fumes are inhaled, remove to ventilated environment and observe for one hour. If unusual symptoms develop, seek medical advice. Dusts from this product should not present problems.

Advice to Doctor: Treat symptomatically. Note nature of product.

Precautions For Use

Exposure Limits: TWA (Time Weighted Average) value of 2 (fumes) refers to average airborne concentration when calculated over a working day (8 hours) for a working week (5 days). No STEL (Short Term Exposure Limit) has been set. Values expressed as mg/m³.

PERSONAL PROTECTION:

Respiratory: Use a face mask or respirator when in a dusty or confined area. Under usual conditions it is usually safe to not use respiratory protection.

Eyes: Not necessary when using this product, but are suggested.

Skin: Clean overalls, preferably with an apron should be worn. Rubber, PVC or other protective gloves are not necessary but are desirable, as is the use of safety boots.

Flammability: Not Flammable.

Safe Handling Information

Storage and Transport: No special storage or transport requirements. This product is not a scheduled poison.

Steps to be taken if material is leaked or spilled: Prevent from entering drains or water courses. Wear gloves goggles and overalls as minimum protection when cleaning a spill. If safe to do so, stop the leak of the product and contain spill. After spills, wash area, ensuring run off does not enter drains. Slippery on floors, especially when wet. Wash all contaminated clothing before reuse.

Waste Disposal: Collect recoverable material and place in containers for recycling or salvage. The remainder can be swept or shovelled up and collected into containers. This material may be suitable for approved landfill, and dispose of only with compliance with regulations.

Fire and Explosion Hazards: No explosion hazard from this material under normal circumstances.
